PROFILE

Data Analyst with 3+ years of experience analyzing technical and operational processes, building real-time data pipelines, and developing interactive dashboards. Specialized in identifying process anomalies, statistical quality control, and building custom tools with Python (Dash/Flask), SQL, and real-time messaging (RabbitMQ). Experienced in working closely with business stakeholders and engineering teams across the full process chain.

PROFESSIONAL EXPERIENCE

Comcoplast GmbH, Düsseldorf, Germany

Administration Support (Minijob / Part-time)

04.2025 – present

- ERP Data Integrity: Monitored and validated critical logistics and billing data in Microsoft Dynamics 365 Business Central to ensure high data quality and accuracy.
- Process Monitoring: Analyzed operational workflows and implemented tracking protocols to prevent bottlenecks and delays across the process chain.
- Stakeholder Coordination: Aligned technical and operational requirements between international manufacturers and internal teams to continuously optimize workflows.

Pratiti Analytics Solutions LLP, Chennai, India

Technology Analyst

08.2023 – 02.2025

- Real-Time Data Pipeline & Messaging: Built a scalable data pipeline to ingest live market data (NSE) via API interfaces and the RabbitMQ message broker.
- Algorithm Development & Quality Control: Implemented technical analysis algorithms (RSI, MACD, VWAP) in Python for automated signal generation, pattern recognition, and error analysis.
- Frontend & Dashboard Development: Designed and built an interactive web application (Plotly Dash) with dynamic filters for signal, quality, and performance analysis.
- Database Optimization: Structured SQLite/SQL databases for storing signal data, contributing to noticeably faster query times.

Ramco Systems, Chennai, India

Analyst Programmer (Data & Reporting)

08.2021 – 01.2023

- Database Administration: Administered and performance-tuned global HR database systems using SQL and SQL Server Profiler.
- Automated Reporting: Built SSRS reporting structures and developed custom SQL queries to deliver reliable quality metrics.
- Cross-Functional Collaboration: Worked closely with business units on requirements analysis, translating complex logic into technical data solutions.

First Feet Business Services, India

Internship: Lead Management Systems

10.2020 – 03.2021

- Application & Database Development: Developed a web application and relational SQL databases (PL/SQL) for structured data capture.
- BI & Data Security: Built Power BI dashboards for process transparency and implemented data masking and access controls.

EDUCATION

M.Sc. Technical Logistics

University of Duisburg-Essen, Germany

10.2024 – present

- Focus areas: Logistics Information Systems, Supply Chain Visibility, Intermodal Distribution Networks.

M.Sc. Computer Science

Bharathiar University, India

07.2019 – 04.2021

- Focus areas: Python, Data Mining & Warehousing, Algorithm Analysis & Design.

Bachelor of Computer Applications (BCA)

Bharathiar University, India

07.2016 – 04.2019

- Focus areas: Relational Database Systems (RDBMS / Oracle), Data Structures, Software Development.

TECHNICAL SKILLS & METHODS

- Languages & Frameworks: Python (Pandas, NumPy, Flask, Dash, Plotly), SQL (Advanced), JavaScript, HTML/CSS
- Databases & Infrastructure: SQL Server, SQLite, PL/SQL, RabbitMQ, REST APIs, AWS
- Business Intelligence & ERP: Power BI, Tableau, SSRS, MS Dynamics 365 Business Central
- Methods: Technical Process Analysis, Root Cause Analysis, Data Modeling, Interface/Systems Understanding, Prototyping

LANGUAGES

- German: Good working proficiency (B2)
- English: Fluent / Business proficient
- Malayalam & Tamil: Native
