PROFILE

Analytical Data Analyst with 3+ years of professional experience (full-time), plus additional practical experience in a current part-time role in an ERP data environment. Solid knowledge of Python (Pandas, NumPy), SQL, Jupyter Notebook, automated reporting, data quality, and building end-to-end data pipelines. Experienced in translating complex data into clear analyses, dashboards, and automated reports, while collaborating closely with internal departments and distributed teams in iterative work processes.

PROFESSIONAL EXPERIENCE

Comcoplast GmbH, Düsseldorf, Germany

04.2025 – present

Administration Support (Minijob / Part-time)

- **ERP Data Integrity:** Monitoring and validating critical logistics and billing data in Microsoft Dynamics 365 Business Central to ensure high data quality and accuracy.
- **Process Monitoring:** Analyzing operational workflows and implementing tracking protocols to prevent bottlenecks and system delays along the process chain.
- **Tools & Systems:** Daily work with MS Excel, MS Access, and Outlook for data maintenance, querying, and communication.
- **Interface Communication:** Technical and operational coordination between international manufacturers and internal teams for continuous workflow optimization.

Pratiti Analytics Solutions LLP, Chennai, India

08.2023 – 02.2025

Technology Analyst

- **Real-Time Data Pipeline & Messaging:** Built a scalable data pipeline to ingest live market data (NSE) via API interfaces and the RabbitMQ message broker, from data capture through to SQL storage and analysis.
- **Python & Jupyter Analysis:** Used Python, Pandas, NumPy, and Jupyter Notebook for data extraction, preparation, and validation, as well as exploratory analysis and targeted data selections.
- **Algorithm Development & Quality Control:** Implemented technical analysis algorithms (RSI, MACD, VWAP) in Python for automated signal generation, pattern recognition, and error analysis.
- **Automated Reporting:** Developed automated daily Excel and Word reports using Python to summarize market activity for the internal Research & Development team.
- **Dashboards & BI:** Designed interactive web applications (Plotly Dash) and Power BI dashboards for signal, quality, and performance analysis for internal departments.
- **Team Coordination & Knowledge Sharing:** Coordinated with team members in a distributed remote team – defining requirements, reviewing colleagues' contributions, and integrating development work into a shared application through iterative work cycles.
- **Database Optimization:** Structured SQLite/SQL databases for storing signal data; used MS Access for supplementary data preparation and storage.

Ramco Systems, Chennai, India

08.2021 – 01.2023

Analyst Programmer (Data & Reporting)

- **Database Administration:** Administered and performance-tuned global HR database systems using SQL and SQL Server Profiler.
- **Automated Reporting:** Built SSRS reporting structures and developed custom SQL queries to deliver reliable quality metrics.
- **Cross-Functional Collaboration:** Worked closely with business units on requirements analysis, translating complex logic into technical data solutions.

First Feet Business Services, India

10.2020 – 03.2021

Internship: Lead Management Systems

- Application & Database Development: Developed a web application and relational SQL databases (PL/SQL) for structured data capture.
- BI & Data Security: Built Power BI dashboards for process transparency and implemented data masking and access controls.

EDUCATION

M.Sc. Computer Science

07.2019 – 04.2021

Bharathiar University, India

Focus areas: Python, Data Mining & Warehousing, Algorithm Analysis & Design.

Bachelor of Computer Applications (BCA)

07.2016 – 04.2019

Bharathiar University, India

Focus areas: Relational Database Systems (RDBMS / Oracle), Data Structures, Software Development.

IT SKILLS & METHODS

- Programming Languages & Frameworks: Python (Pandas, NumPy, Flask, Dash, Plotly), SQL (advanced), JavaScript, HTML/CSS
- Data Analysis Tools: Jupyter Notebook, automated reporting, data validation
- Databases & Infrastructure: SQL Server, SQLite, PL/SQL, RabbitMQ, REST APIs, AWS
- Business Intelligence & ERP: Power BI, Tableau, SSRS, MS Dynamics 365 Business Central
- MS Office: Excel (advanced), Access, Outlook
- Methods: Technical Process Analysis, Root-Cause Analysis, Data Modeling, Iterative & Collaborative Teamwork, Prototyping
- Currently building: SAS fundamentals, building on existing Python experience

LANGUAGES

- German: Good working proficiency (B2)
- English: Fluent / Professional working proficiency
- Malayalam & Tamil: Native
